

Unresolved issue 83.

The new C standard **has** been published. The correct date to put into our reference is 1999. Copies can be purchased for \$18 from www.techstreet.com, in electronic form. The format is PDF, it isn't as rich bookmark wise as it might be, but it's quite usable. The standard is 554 pages long, and consumes approximately 1.4Mb.

I would suggest the following edit

Page 7 lines 11-12 both instances of ":1990" to be replaced with ":1999"

And naturally, deletion of the unresolved issue note itself ;>
