Subject: TARGET attribute clarification

1. Introduction

The discussion of the TARGET attribute omits to mention an important class of objects that have the TARGET attribute - objects allocated by pointer allocation. This <u>is</u> mentioned in 6.3.1.3, but that is rather distant.

We should add a note and forward reference.

2. Edits to 01-007

[75:14] Delete "or POINTER".

{Remove misleading clause.}

[75:14+] Add note

"Note 5.16a:

In addition to variables explicitly declared to have the TARGET attribute, the objects created by allocation of pointers (6.3.1.3) implicitly have the TARGET attribute."
