## 1. Introduction

Issue 324 notes that we use "host" and "host scoping unit" interchangeably, but that the words used to describe them in the glossary are slightly different. It suggests that we just define "host" as short for "host scoping unit", like we do for "object" and "data object".

I concur. Edits are supplied

## 2. Edits to 01-007r1

[12:7] Before "." insert "(often abbreviated to **host**)".

[402:19-20] Replace with "**host** (2.2): Host scoping unit."

[402:21-30] Delete J3 note 324.
