

Subject: Unresolved issue 351 (the one in Annex C)
From: Van Snyder

1 **1 Introduction**

2 I wrote the paragraph about which unresolved issue 351 complains, so I'll try to fix it.

3 **2 Edits**

4 Edits refer to 02-007. Page and line numbers are displayed in the margin. Absent other
5 instructions, a page and line number or line number range implies all of the indicated text is to
6 be replaced by associated text, while a page and line number followed by + (-) indicates that
7 associated text is to be inserted after (before) the indicated line. Remarks are noted in the
8 margin, or appear between [and] in the text.

9 [Editor: "An ... present" ⇒ "A benefit of using the ONLY specifier consistently, as compared 444:14-15
10 to USE without it, is that the module from which each accessed entity is accessed is explicitly
11 specified".]

12 [Editor: Delete unresolved issue note 351.] 444:16+1ff
