Subject: Editorial comments on Section 5
From: Van Snyder

1 Edits

Edits refer to 03-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

[The current words do an extremely poor job of explaining an effect similar to INTENT(IN). Editor: 84:5 Replace "it shall ... change" with "its association shall not be changed except that it may become undefined if the target is deallocated other than through the pointer (16.4.2.1.3) or if the target becomes undefined by execution of a RETURN or END statement". Most of these words were cadged from [81:15-17].]
