Subject: First draft of edits to allow forward type for allocatable components
From: Van Snyder
Reference: 03-399

1   Edits

Edits refer to 04-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

[Editor: Revise Constraint 438:]   50:18-20

C438   (R440) If neither the POINTER nor ALLOCATABLE attribute is specified for a component, the
         declaration-type-spec in the *component-def-stmt* shall specify an intrinsic type or a previously
         defined derived type.
