

J3 response to WG5 resolution V4

WG5 Vienna [resolution V4](#) requests J3 to assume responsibility for the work on interoperability with C. J3's response to this request is:

J3 accepts this responsibility, on the condition that J3 be allowed to do the work as a "firm requirement" for Fortran 2000 (an "R" item in the [J3 workplan](#)) and not in its current form as a technical report.
