

Subject: Unresolved issues 78 and 141
 References: 99-141r1
 From: Van Snyder

1 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

Change bars show changes between 99-185r2 and 99-185r3.

[Editor: Add a new paragraph.]	82:2+	
If a pointer is associated, the values of its deferred type parameters are the same as the values of corresponding type parameters of its target.		
If <i>target</i> is not a disassociated pointer, all nondeferred type parameters of the declared type of <i>pointer-object</i> shall have the same values as the corresponding type parameters of <i>target</i> . Otherwise, all nondeferred type parameters of the declared type of <i>pointer-object</i> that correspond to nondeferred type parameters of <i>target</i> shall have the same values as the corresponding type parameters of <i>target</i> .	156:11-31	
[Editor: Replace “when it is invoked” by:]	156:34	
, if it returns an allocated allocatable result or an associated pointer result.		
[Editor: delete.]	156:37-48
