

1 **Issue 312 - Additional KIND Arguments**

2 To: J3
3 From: Craig Dedo
4 Date: March 19, 2001
5 Subject: Issue 312 - Additional KIND Arguments

6 **Issue**

7 Paper 00-352 added additional arguments to several (12) intrinsic procedures. This should probably
8 be noted in 1.5.1 much like the additional intrinsics. This could invalidate formerly standard
9 user-written generic extensions. Not that I think it a big deal, but it is as pertinent as other
10 incompatibilities noted.

11 **Analysis**

12 Upon close examination, JOR determined that there is no issue. The rules for generic
13 resolution in 343:47-344:2 require that the user will get his definition.

14 **Edits**

15 Edits are with respect to the 01-007.
16 [3:20-25] Delete the J3 internal note.
