Subject: TARGET attribute clarification

1. Introduction

The discussion of the TARGET attribute omits to mention an important class of objects that have the TARGET attribute - objects allocated by pointer allocation. This is mentioned in 6.3.1.3, but that is rather distant.

We should add a note and forward reference.

2. Edits to 01-007

[75:14+] Add note

"Note 5.16a:

In addition to explicit declaration of variables with the TARGET attribute, allocation of a pointer creates an object that implicitly creates the TARGET attribute (6.3.1.3)."
