Subject: Comments on Section 3
From: Van Snyder

1   Edits

Edits refer to 02-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

["in terms of" doesn't feel right. Editor: "Other ... types" ⇒ "By supplying nondefault character types, the processor may support additional character sets".]	24:15-16
[Editor: "when" ⇒ "where" in the first line of Note 3.3.]	25:8-
[Note 3.6 doesn't contribute anything. Editor: Delete Note 3.6.]	28:2+
[Editor: "when" ⇒ "where".]	28:4
[Editor: "**separation**" ⇒ "**termination**".]	28:9
If a statement is not continued, a comment or the end of the source line terminates the statement.	28:9+ New ¶
[Editor: "The ... appears" ⇒ "A statement may also be terminated by a ";" character that appears other than".]	28:10
[The semicolon is defined to be a terminator, and then referred to three times as a separator. It is also possible to read "followed by zero or more blanks and one or more ';'..." not to include "; ; ;".]	28:13-14
line. A sequence consisting of at least one ";" terminator and any number of blanks is equivalent to a single ";" terminator.	
[""&'" ⇒ ""&"".]	28:18
[Editor: Move [28:9-14] (subclause 3.3.1.2) to here.]	29:8+
[This is the only place in 3.3.1 where we say "free form". Ironically, it's one of the few places where free form and fixed form are identical. Editor: Delete "free form".]	29:11
[Editor: "when" ⇒ "where".]	29:18
[Editor: "The ... appears" ⇒ "A statement may also be terminated by a ";" character that does not appear".]	29:24
[Editor: "**separation**" ⇒ "**termination**".]	29:23
If a statement is not continued, a comment or the end of the source line terminates the statement.	28:23+ New ¶
[The semicolon is defined to be a terminator, and then referred to three times as a separator. It is also possible to read "followed by zero or more blanks and one or more ';'..." not to include "; ; ;".]	29:27-28
A sequence consisting of at least one ";" terminator and any number of blanks is equivalent to a single ";" terminator.	

1 [Editor: Move [29:23-28] (subclause 3.3.2.2) to here.]   30:1+

2 [Editor: Delete "fixed form" – see remarks for [29:11] above.]   30:5

3 [Observation for J3 to ponder – no edit here: Item (4) of Note 3.11 is prohibited by [29:14].]   30:26+

2   3.3.1.3.1 and 3.3.1.3.2 aren't parallel in construction

3.3.1.3.1 begins "If an "&" ... the statement is continued. 3.3.1.3.2 begins "If a character context is to be continued the "&" .... They ought both to begin "If a ... is to be continued ... an "&".

If a noncharacter context is to be continued, an "&" shall be the last nonblank character on 28:22-23 the line, or the last nonblank character before an "!". There shall be a later line that is not a comment, and the statement is continued on that line. If the first nonblank

[The editor thinks the fifth level of subdivision is unnecessary. Editor: Delete.]   28:21

[Editor: "the next noncomment" ⇒ "that" twice.]   29:1-2

[The editor thinks the fifth level of subdivision is unnecessary. Editor: Delete.]   29:5

[Editor: first "the" ⇒ "an".]   29:6
