

Subject: Instructions and Authorizations for the Editor
From: Van Snyder

1 Introduction

2 There has been some discussion about minor restructuring of 007. In particular, there is general
3 agreement that the general index ought to be the last index. There is also some sentiment that
4 the syntax term index ought to be integrated into the general index, that there ought to be a
5 BNF cross reference at the end of the BNF summary, and that notes that are continued ought
6 to have an indication that they are continued.

7 The Editor has indicated that at this late stage he would prefer not to make these changes
8 without formal authorization.

9 2 Issues for J3 votes

- 10 (1) Move the general index to be the last annex.
- 11 (2) Integrate the syntax term index into the general index.
- 12 (3) If possible, notes that are continued onto a subsequent page ought to have a con-
13 tinuation indication at the bottom of the page. In a previous version of the macros,
14 this was done by leaving off the bottom line, but an indication such as (**cont.**) at
15 the bottom of the page is preferred.
- 16 (4) The Editor is authorized to put a BNF cross reference at the end of the BNF
17 summary annex, if such can be developed without undue effort.
