Subject: Editorial comments on Section 16
From: Van Snyder

1   Edits

Edits refer to 02-007r3. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

[Editor: Insert ", a type-bound procedure," after "pointer".]   411:39+5

[Note 16.19 has nothing to do with anything nearby. Editor: Move it to [413:6+].]   412:top

[16.5.6 is about events, not enduring conditions. All of the other items say "becomes undefined"   412:29-37
instead of "is undefined". Editor: "is undefined" $\Rightarrow$ "becomes undefined" four times, at [412:29-30, 31, 35, 37].]

[The phrase is mangled. Editor: Insert "of" after "subcomponents".]   412:32

[Item (12c) overlooks components that have default initialization. Editor: Insert "except for   412:34
any nonpointer default-initialized subcomponents of the argument" after "undefined".]

[Editor: Insert "of its" after "any"; delete "of the result".]   412:37-38

[16.5.6 is about events, not enduring conditions. Editor: "has completed" $\Rightarrow$ "completes". All   412:41
of the index names become undefined. Editor: "*index-name*" $\Rightarrow$ "*index-name*s"; "becomes" $\Rightarrow$ "become".]
