

Subject: First draft of edits for forward type for allocatable components  
From: Van Snyder  
Reference: 04-399

1 **1 Introduction**

2 Assuming forward types for allocatable components get onto the J3 work plan, the reason for this paper  
3 is to get a running start on the edits.

4 **2 Edits**

5 Edits refer to 04-007. Page and line numbers are displayed in the margin. Absent other instructions, a  
6 page and line number or line number range implies all of the indicated text is to be replaced by associated  
7 text, while a page and line number followed by + (-) indicates that associated text is to be inserted after  
8 (before) the indicated line. Remarks are noted in the margin, or appear between [ and ] in the text.

---

9 C438 (R440) If neither the ALLOCATABLE nor POINTER attribute is specified, the *declaration-type-* 50:18-20  
10 *spec* shall specify an intrinsic type or a previously defined derived type, and each *component-*  
11 *array-spec* shall be an *explicit-shape-spec-list*.
