

Subject: Edits to allow ASCII arguments for LGE etc.
From: Van Snyder
Reference: 03-258r1, section 2.4.4.5, 04-185, 04-398, WG5/N1626-J3-027

1 Edits

Edits refer to 04-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

Replace the argument descriptions of **LGE** [327:15-16], **LGT** [327:29-30], **LLE** [328:10-11] and **LLT** [328:24-25] with the following:

STRING_A shall be of type character with either default or ASCII kind.
STRING_B shall be of type character with the same kind as STRING_A.

2 Alternative definition for STRING_B

STRING_B shall be of type character with either default or ASCII kind.
