

Subject: Feature creep suggestions for Clause 12
From: Van Snyder

1 Edits

2 Edits refer to 06-007. Page and line numbers are displayed in the margin. Absent other instructions, a
3 page and line number or line number range implies all of the indicated text is to be replaced by associated
4 text, while a page and line number followed by + (-) indicates that associated text is to be inserted after
5 (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

6 [What's the point of the "nonoptional" restriction? Where used for defined assignment, both actual 305:13-14
7 arguments are going to be present. Elsewhere, it just prevents a class of defined-assignment routines to
8 be used for other purposes. Editor: "arguments. . . nonoptional" ⇒ arguments that are".]

9 [An ASSOCIATE construct is executable. The name of a dummy argument in an ENTRY statement 331:31
10 ought to be allowed to appear as the *associate-name* in a prior ASSOCIATE statement, since the
11 *associate-name* is the name of a construct entity. Editor: Insert "except where it is an *associate-name*
12 within an ASSOCIATE or SELECT TYPE construct," before "unless".]

13 [Editor: "the entity" ⇒ "an entity", insert " , or has type and type parameters determined by the implicit typing rules 333:24
14 in effect in that scoping unit" after "function".]
