Subject: Comments on Clause 2
From: Van Snyder

1   Edits

Edits refer to 06-007r1. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

[Editor: Quote R1237 from [330:15-19] here.]	10:37+
[Editor: Insert the following syntax rule alternative:]	11:24+
or *end-mp-subprogram-stmt*	
[Editor: Delete "or", then insert ", or "*end-mp-subprogram-stmt*" at the end of the sentence.]	11:50-51
[Editor: Delete first "and" and insert "any number (including zero) of" before "other".]	12:23
[Editor: "the internal procedure" ⇒ "its name" because internal procedures are now accessible elsewhere by way of dummy arguments and procedure pointers.]	13:14
[Editor: "type-bound" ⇒ "module" because a type-bound procedure isn't a different kind of procedure — it's the result of a binding — whereas interface bodies can be used to describe the interface of a module procedure that has its body elsewhere.]	13:18
[Editor: "The Programmer ..." ⇒ "Fortran control constructs (8.1, 8.2) control the progress of execution in each image".]	14:11+2-3
[Editor: Insert ", excluding those in the *specification-part* of a BLOCK executable construct" at the end of the statement, then delete UTI 095.]	14:19-19+4
[Editor: Insert "within the scoping unit of the procedure" after "appearing" because it otherwise would conflict with [16:29-30] if there are no executable constructs after the entry point and the first executable construct in the internal procedure.]	16:16
a portion of a complex object (the real or imaginary part)	18:13+4+
[Editor: The term "co-bounds" needs a definition. Editor: Within the paragraph, add a new sentence "The bounds for each co-dimension are called **co-bounds**." Then un-bold the two appearances of "**co-bounds**" at [92:33] and [93:9] because they aren't definitions.]	20:8
[Editor: Insert "or argument association (12.5.2.8)" after "(6.3.1)".]	20:21
[Editor: Delete the paragraph.]	23:1-3
