

Subject: Feature creep postponed from 177
From: Van Snyder
References: 06-187:68-69

1 **1 Introduction**

2 The feature creep suggestion at lines 68-69 in 06-187 was neither accepted nor rejected at meeting 177.
3 Here it is again, with more complete edits. The point of the suggestion is to allow to put the declaration
4 of a FORALL index variable closer to where it's used.

5 **2 Edits**

6 Edits refer to 06-007r1. Page and line numbers are displayed in the margin. Absent other instructions, a
7 page and line number or line number range implies all of the indicated text is to be replaced by associated
8 text, while a page and line number followed by + (-) indicates that associated text is to be inserted after
9 (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

10 **R754** *forall-header* **is** ([INTEGER [*kind-selector*] ::] *forall-triplet-spec-list* ■ 168:33
11 ■ [, *scalar-mask-expr*])

12 [Editor: “that” ⇒ “. If INTEGER *kind-selector* :: appears in *forall-header* it has integer type with the 487:10
13 specified kind. If INTEGER :: appears it has integer type and default kind. Otherwise it”.]

14 [Editor: “; it” ⇒ “. If IMPLICIT NONE is in effect either INTEGER [*kind-selector*] :: shall appear or 487:12
15 a variable of the same name shall be declared or accessed by host or use association in the scoping unit
16 containing the construct. It”.]
