To: J3   J3/18-157
From: Dan Nagle & Lorri Menard
Subject: Emeritus for Stan
Date: 2018 May 25

This document nominates Stanley (Stan) Whitlock as an Emeritus Member of the PL22.3, Programming Language Fortran committee.

Stan joined the PL22.3 Fortran committee (at the time named J3) in May 1992, as the representative from Digital Equipment Corporation. That year, he was put to work immediately as the head of the JOR (Journal of Requirements) subcommittee. He retained these positions until his retirement from Intel Corporation in December 2016.

During his tenure on PL22.3, Stan also took on the chairmanship of the Interp (Interpretations) subcommittee, and the roles of both Recording and Membership Secretary.

Stan continued in the position of corporate representative through two subsequent mergers, ending his career as the representative from Intel Corporation.

Stan contributed hundreds of edits to the standard during this 24 year period. He also offered insightful assessments on the value and "supportability" of dozens of features and proposed changes.   He was always willing to help new committee attendees find their way through the committee processes.

In summary, Stan contributed much to the "face of Fortran" as it is today, and we recommend that he be granted Emeritus status in the PL22.3, Programming Language Fortran committee
