

Subject: More work on deferred type parameters

References: 99-141r1

From: Van Snyder

## 1 Introduction

These problems are not addressed by any of the editor's unresolved issues.

## 2 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [ and ] in the text.

---

[[Editor: After "all of its" add "deferred type parameters, deferred array bounds, and".] 77:31

---

Replace "with the same shape." by ". If it is an array, it is allocated with the same bounds. 153:42  
If it has deferred type parameters, the values of deferred type parameters of the component of *expr* are used for the values of corresponding parameters of the component of *variable*."

---

If type parameters of a function result are deferred, which parameters are deferred is a characteristic. 262:29+

---

(7) If it has type parameters, they shall not be inquired about. 279:35+
