## 1 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [ and ] in the text.

---

[Editor: Replace the period by a comma, and add the following:] 372:33

- (5) The pointer is a dummy argument with INTENT(OUT) and the procedure of which it is a dummy argument is invoked,
- (6) The pointer is associated with a pointer that becomes deallocated,
- (7) The pointer is associated with an allocatable object that becomes deallocated.

- 
- (6) A reference to a procedure causes each dummy argument that is associated with an actual argument and does not have INTENT(OUT) to become defined if its associated actual argument is defined with a value that is not a statement label. 376:25-33

When a dummy argument becomes defined, each subobject of the dummy argument becomes defined if the corresponding subobject of the associated actual argument is defined.

---

[Editor: Add a new subsection (not necessarily here):] 379:10+

### **14.x Events that cause allocatable entities to become deallocated**

An allocatable entity becomes deallocated when it is

- 1. deallocated by a DEALLOCATE statement;
- 2. a dummy argument with INTENT(OUT) and the procedure of which it is a dummy argument is invoked;
- 3. a function result value and the function is invoked;
- 4. a non-saved entity that “goes out of scope;”
- 5. a non-saved entity that “comes into scope,” or a saved entity that “comes into scope the first time;”
- 6. the target of a pointer that is deallocated;
- 7. a subobject of a *variable* on the left side of the equals sign in an intrinsic assignment statement;
- 8. a subobject of an entity that is deallocated.

[Editor: Add an unresolved issue:]

I don't know the correct words for the fourth and fifth items above.
